TATUNG EINSTEIN REBORN!

Welcome

Tatung Einstein
REBORN! | TATUNG EINSTEIN COMPUTER

Welcome to Tatung Einstein Reborn! I'm Magno, and this site is dedicated to the Tatung Einstein and Tatung Einstein 256 microcomputers. See screenshots of software and hardware, check out games I wrote myself. Browse the extensive collection of Einstein games and other software in disk image format, download the supplied emulator, and enjoy playing them on your current computer! There is even an extensive collection of scanned Einstein magazines and manuals on the site which you can download and view in PDF-format.

The Tatung Einstein is rare now and even more so, the Tatung Einstein 256 which was made primarily as a game machine. This website is here to remind people of these great machines. Browse through my wanted list to see if you have anything I could use. See the messages available for this machine and pictures of the Tatung Einstein FC10 and Tatung Einstein 256 computers. Make sure to visit my guestbook before you leave and make yourself known! Enjoy and pop in often as I will be constantly updating this site to keep it dedicated to all things Tatung Einstein.

If you have any games software I could use, please consider selling or donating it to me. I'd love to hear from you! You can email me [here](#). Have a look at my [Most Wanted List](#), however get in touch no matter what games software you have!

The vast majority of disk images you will find on this site were created by myself starting from the birth of the site in 2006, and I have been slowly adding to the library ever since. I pride myself on bringing such a large collection of Einstein images into the public domain for enthusiasts around the world to relive some great memories! I have scanned countless Einstein manuals and magazines for public use as well and there is still more to come in the future!

This site has helped many people around the world relive their cherished Tatung Einstein memories.
