

# Albert's Monthly Note.

Issue 03/04 October 90

Albert's Monthly Note. October 1990

Hello again! Well, it has really been another hectic month! My Amiga once again went AWOL, and my friends are getting a little impatient as far as Amigas are concerned!

The Einstein side of the group is 100% at the moment, and I'm expecting a lot of software to come along soon, with additional pieces of hardware, like 80 column cards, Silicon Drives and Einstein TC01's. If you would like to know the latest pieces of hardware and software I have got, please phone as new things are always arriving!

Disaster struck last month, or rather Scott Huxley once again let people down! This time, instead of letting 60 people down in a computer group, he let quite a few down when the show was cancelled! So much for the Midland User Group!

Never mind, there is at least one good show which WILL happen next month! This show is at Bingley Hall, Stafford. This promises to be a very good show, with Sharwood Services, Surrey Software, B + H and Beds Computer Group going! Expect lots of bargains as there will be a MASSIVE Bring & Buy sale. Admission is £2.00 for Adults and £1 for children, I will look forward to meeting a lot of you there!

The Date for the Show is Saturday 10th November.  
And is held at Bingley Hall, Stafford Show Ground.

Phone 0473 602460 for more details.

Well, after getting that small bit of information over with, I shall tell you what I'm taking up there!

To start with there will be the usual second hand software and hardware.

To be launched at the show "NEW" will be AEGOS (Addictive Einstein Games of Skill), and Tubes Version 6.6, the final in my mouse, trackball, joystick or keyboard utilities, Along with this will be another games/utilities pack (Name still to be announced) and, of course FlexiDos 2.2.

Well, that's all I will say for the moment! I will give you all a nice big magazine for you to read for November, untill then though, have a good month.

Roy Prime.
