SOFTWARE LIBRARY -- DISK SIZES/PRICES (4/95)

Unless otherwise ordered, Software Library volumes are supplied on 3" floppy disk, each side of which will generally hold one Software Library volume.

NOTE THAT SOME VOLUMES ARE LARGER THAN ONE FLIPPY DISK SIDE. THESE ARE CLEARLY SHOWN IN THE SUMMARY LIST, AND EACH PART COUNTS AS ONE VOLUME.

Software Library volumes can ALSO be supplied on 3.5" disk, or on 5.25" disk for use with a 40-track drive, or on 5.25" disk for use with an 80-track drive.

Software Library disks are supplied as 40-track single-sided disks REGARDLESS OF DISK OR DRIVE SIZE, so that you have the correct system tracks for the volume, and can boot off it (if you have set up a non-standard drive configuration), or can BACKUP the volume to one side of a 3" floppy.
